DETAILED ACTION

Election/Restrictions

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The at least five species are as follows:

Group I, Embodiment 1, Figures 1 through 6.

Group II, Embodiment 2, Figures 7 through 11.

Group III, Embodiment 3, Figures 12 through 15.

Group IV, Embodiment 4, Figures 16 through 20.

Group V, Embodiment 5, Figures 21 through 23.

Remaining Figures 24 through 36 are directed to Sub-Species:

In addition to the number of projectors employed within a particular species to form a sub-species, a variety of components claimed add to the potential for permutating varying embodiments such as: masks, prisms, polarizers, color filters, types of optical gratings, and varying screen constructions including a holographic screen, for example.

Applicant is required, in reply to this action, to elect a single species and a single sub-species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species,

including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
